

Good Day! Thank you for showing your interest in participating in my study.

As part of the study, I would like to humbly request for about 10-30 minutes of your time to perform a few tasks while answering a survey relevant to the use of the application. This form will contain a nine (9) item Single Ease Question (SEQ) and a ten (10) item System Usability Scale (SUS).

Upon the form's submission, you agree that the information you have provided will be used solely for the purposes mentioned above, and have answered this survey willingly.

* Indicates required question

Before you proceed, please ensure that the app is installed to your device. You may download the .apk file from this google drive link: <https://tinyurl.com/grsms-download>. The application can be installed to devices with android version 7 (nougat) and above. Open the app and accept the necessary permissions to continue.

If you are using a dual sim, it is highly recommended to remove the sim you are not going to use at least for the duration of the test as the application will use whichever SIM card is set as the default for SMS messaging. If you choose to keep both sim card, please ensure that the SIM you will be using set as the default at least for the duration of you testing the application. Thank you!

In this section, you will be given a task that you will perform while using the application. After completing a task, you will be asked to rate the difficulty of each task from 1 as very difficult (left most column) to 7 as very easy (right most column). Please give your most honest answer on what you feel is most appropriate for each item. Feel free to explore the app further after completing the tasks listed before proceeding to the next section.
